EDUCATION

Northwestern University

B.S. in Computer Science, Minor in Economics

Evanston, IL

Expected June 2025

- **GPA:** 3.45/4.00
- **Awards:** Northwestern Scholarship, CS Undergraduate Innovation Fellowship, ROTC Scholarship
- **Coursework:** Databases, Data Structures, Deep Learning, Scalable Architectures, Corporate Finance

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, C, R, SQL, Java, HTML, CSS, TypeScript, C#, Scala, MATLAB
Frameworks/Libraries: React, Node.js, Agile, TensorFlow, Next.js, Express, PyTorch, Flask, NumPy, Pandas
Developer Tools: Git, AWS (Lambda, S3, RDS, EC2), Linux, Unix, Excel, NPM, Figma, Canva, Tableau

EXPERIENCE

Data Science Intern

SONIC Research Group

Jun 2024 - Present

Evanston, IL

- Develop a **custom multi-label sentiment analysis classifier** by fine-tuning a RoBERTa model using **Hugging Face and PyTorch**, achieving **85-99% accuracy** across 5 labels for analyzing human-AI team interactions.
- Analyze and annotate **29,000 human-AI conversational messages** to address challenges of context understanding and sarcasm detection, improving classification accuracy by **10-15%**.

President

Ahana Dance Project

Jun 2024 - Present

Evanston, IL

- Oversee venue bookings, practice space reservations, and executive board responsibilities to organize performances with over **200** attendees and lead annual **recruitment and engagement** of new members.

Chief Technology Officer

Student Holdings

Oct 2022 - May 2024

Evanston, IL

- Monitored a **\$5,000** annual software budget for a portfolio of **4 student-run businesses**, achieved quarterly deliverables, and maintained client communication to align **business strategy** with technological development.
- Managed a cross-functional team of analysts and led development of an interactive **React and Firebase** application serving 40+ students to assist generation of **\$100,000+ in annual revenue**.

App Development Intern

Origin Robots Company

Apr 2023 - Sep 2023

Chicago, IL

- Built a multiplatform **Electron and React** desktop application prototyped in **Figma**, implementing **serial communication** for precise control and real-time device interaction with custom PCBs in TPU prostheses.
- Maintained company website and product documentation to connect with **10+ investors and researchers**, secure **\$5,000+** in funding with an NSF research proposal, and contribute to brand expansion.

PROJECTS

SuggestMe | *Next.js, JavaScript, AWS, Tailwind*

Aug 2024 - Present

- Developing a **full-stack** recommendation platform for personalized concert discovery and playlist creation.
- Built frontend using **React** and **Tailwind CSS** with **Redux** for persistent state and authentication.
- Implemented **CI/CD** using the **Serverless Framework** with **AWS Lambda** and **RESTful API** endpoints.

RetroScan | *C, Linux*

Sep 2024 - Dec 2024

- Designed and implemented an **embedded system** to RFID-tag and display data from records and VHS tapes.
- Wrote custom RFID and display drivers for the Nordic nRF52833 SoC on the **Microbit v2 microcontroller**.
- Utilized **low-level I2C, ADC, and SPI communication protocols**, supporting metadata acquisition.

PAM | *Python, SQLite3, Flask, AWS*

Oct 2023 - Apr 2024

- Architected a **large language model** to act as a virtual receptionist for Northwestern's CS department.
- Integrated **GPT-4** with **SQLite3** to create a **conversational pipeline** deployed with **Flask** on **EC2**.
- Streamlined information access to **60+** professors and events, and reduced query time by **40%**.
